* Performance shown for 2014 is from October 31, 2014 through December 31, 2014.

N.A.¹ – The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three-year annualized standard deviation is not presented for 2014 through 2016 due to less than 36 months of composite and benchmark data.

The Emerging Markets Composite includes portfolios that invest in domestic equities. Portfolios invest not less than 80% of its assets in Mexican equity market and may hold some debt instruments as the portfolio looks for favorable equities to hold, seek investment results that correspond to the return of the Indice de Precios y Cotizaciones (IPC).

For comparison purposes, the composite is compared to the MSCI Emerging Markets Index and it's designed to measure equity market performance in global emerging markets. The Emerging Markets Index is a float adjusted market capitalization index that consist of indices in 21 emerging economies: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Morocco, Peru, Philippines, Poland, Russia,.... The index covers approximately 85% of the free float-adjusted market capitalization in each country. The index is available on <https://www.msci.com/>.

The Emerging Markets Composite Creation Date was October, 2014. (The rebalancing of the benchmark is annual) The minimum account size for this composite is 130 million Mexican Pesos.
